

Automatically Increase System Speed and Performance

It's a fact: The day-to-day build up of disk fragmentation causes slowdowns, crashes and slow boot times. If allowed to grow unchecked, fragmentation can even lead to catastrophic crashes and the inability of a system to boot up.

Daily defragmentation would solve these problems, but who's got the time and resources to manually defragment every single laptop, server and workstation on a daily basis? That's why you need Diskeeper, the Number One Automatic Defragmenter™. With Diskeeper installed on your systems, fragmentation-related problems and productivity losses simply go away. All you need to do is "Set It and Forget It"®!

- **NEW!** High-speed defragmentation engine with I/O Smart™ technology ensures that automatic defragmentation never interrupts or slows down normal file access
- **NEW!** FragShield™ boosts reliability by preventing fragmentation of critical system files
- **NEW!** "Set It and Forget It"® scheduling supports primary and secondary schedules for each volume
- **NEW!** Complete scheduling and management through Active Directory group policies

Diskeeper 9 Editions:

Diskeeper 9 Professional Edition saves costs and reduces help desk traffic by automatically defragmenting desktops, laptops and workstations

Diskeeper 9 Server Standard Edition optimises reliability and speed, boosting server performance and reducing downtime
Diskeeper 9 Server Enterprise Edition uses revolutionary technology to provide fast, thorough automatic defragmentation of enterprise-level and mission-critical servers

Diskeeper 9 Administration provides complete centralised management of Diskeeper 9 across your entire network

30-DAY SATISFACTION GUARANTEE:

Buy Diskeeper 9. If you're not totally satisfied, contact us within 30 days for a complete refund!

Get optimum performance and reliability from every PC, laptop and server at your site

Disk fragmentation is a problem that affects every Windows system from low-end desktops to enterprise servers. Now that disks and files are growing larger and larger, it's a bigger problem than ever. Fragmentation accumulates exponentially, causing slowdowns, freeze ups, and even complete crashes. In worst-case scenarios, fragmentation can bring the fastest systems to their knees within a matter of hours.

Many system administrators wind up attempting to combat fragmentation on a "breakfix" basis. They send out technicians to deal with systems suffering from random crashes or sluggish performance. Whether they realize it or not, fragmentation is often the root cause. Why chase after fragmentation when you can eliminate it completely? The answer is automatic defragmentation with Diskeeper, the Number One Automatic Defragmenter.

Diskeeper 9 is the complete solution designed to automatically eliminate fragmentation while you and your users work. Diskeeper 9 features high-speed defragmentation technology that runs undetected in the background. And only Diskeeper offers the Terabyte Volume Engine™, the only defragmentation engine designed specifically for the special needs of high-capacity servers. Your users will hardly know when Diskeeper is active, but you'll quickly see the benefits: Reduced Help Desk traffic, increased reliability, and systems that always run like new.

- **NEW! Enhanced "Set It and Forget It"** scheduling allows primary and secondary automatic defragmentation schedules for each volume
- **NEW! FragShield** boosts reliability and availability by preventing crash-inducing fragmentation of critical system files
- **NEW! I/O Smart** monitors I/O requests and pauses automatic background defragmentation to allow other processes and applications to have priority access to the drive
- **EXCLUSIVE! Smart Scheduling™** automatically schedules background defragmentation as needed based on system usage patterns
- **EXCLUSIVE! Terabyte Volume Engine** is a new generation defragmentation engine designed for fast, thorough automatic defragmentation of large enterprise-class server volumes (Exclusive to Diskeeper 9 Server Enterprise Edition)
- **EXCLUSIVE! Administrator Edition** provides complete centralised management of Diskeeper, including remote installation, scheduling, configuration, remote control, reports, and e-mail alerts
- **NEW! Management via Active Directory Group Policies** with our **FREE** Diskeeper 9 group policy template
